

DIR SIR AND MADAM!

We offer for sale:

Fine dispersion recycle

made from multi-layer waste

Properties

Type of material	Low density Polyethylene (LDPE)
Particle size	0,1-0,4 mm
Purity level	<98%
Amount	20 tones/month
Packaging	big-bag (100-1000) kg
Form	powder
Price	645 USD/tones

Application:

- Production of new types of polymer composites using organic and inorganic metal additives in the process of physical modification of the raw material
- Manufacturing of large-size, three-dimensional products using rotational molding (centrifugal molding)
- Polymer granules (powder agglomeration) used in injection molding machines
